## 語系對應表:

## 1.4.1 版本調整之處:

初始在最後加入語系與幣別,其餘功能參數不變,

下列範例為預設馬來語跟 MYR 支付

```
1. _connectTool = new ConnectTool(
    this,
    ".....://connectlink",
    "----BEGIN RSA PRIVATE KEY----\n" + "MIIEowIBAAKCAQEAudt2mFGvE.....",
    "ebe4ae.....",
    "AQAAAA.....",
    "07d5c2.....",
    "ms",
    "128");
```

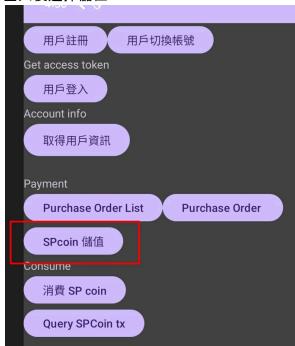

## 支付測試事項:

1. 初始工具設定語系 ms 與幣別 128

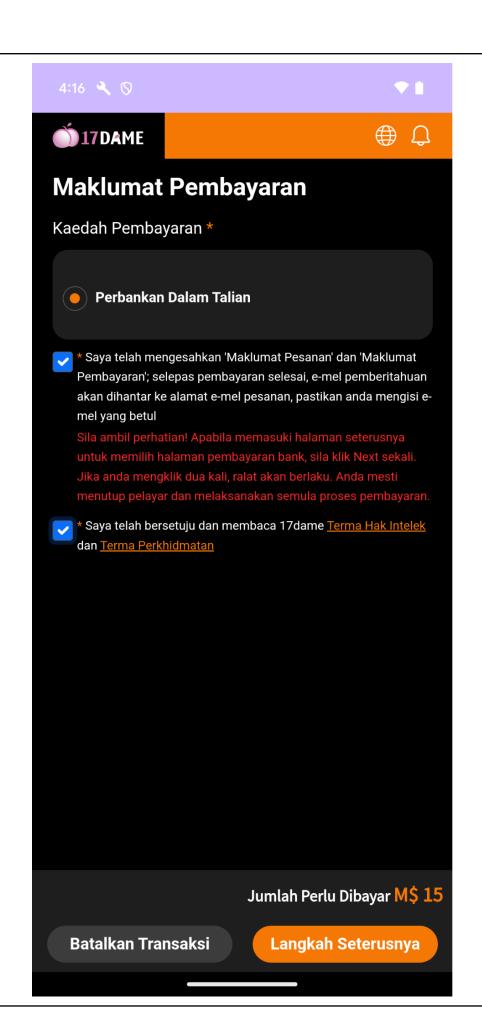

### 2. 請將 ToolVersion 設定為 test:

 $\label{lem:connectTool} $$ \_ connectTool.setPlatformVersion(ConnectTool.PLATFORM\_VERSION.nativeVS); $$ \_ connectTool.setToolVersion($$ $ connectTool.TOOL\_VERSION.testVS$$); $$$ 

#### 3. 登入後選擇儲值:

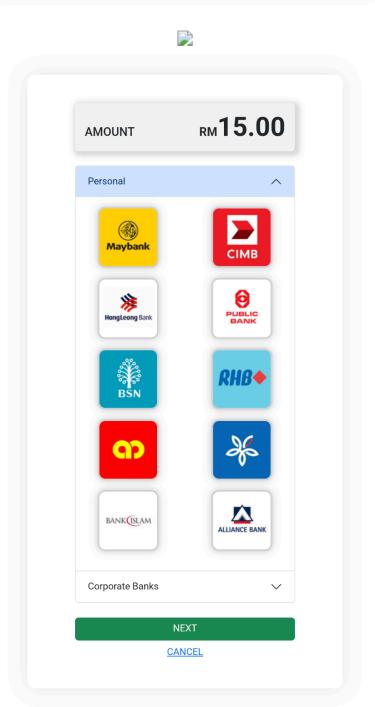

4. 選擇馬來西亞支付

5. 因為是測試支付, 按下方的 "CANCEL" 就會直接完成測試訂單

Reminder:

1. Kindly ensure that you have activated Online Payment capabilities on your account

#### 6. 完成馬來西亞支付入帳
